Content Playbook.

The system behind every post, video, and caption. How we think, write, and design content that converts attention into clients.

Prepared by CrftdWeb
April 2026

Classification
Internal Use Only

CONTENTS

What's Inside

Everything you need to create content that sounds, looks, and converts like CrftdWeb.

---

01 — Brand Positioning

Who we are, who we're talking to, and the one line that drives everything.

02 — Voice & Tone Rules

How we sound. The words we use. The words we never use.

03 — The PAS Framework

Problem → Agitate → Solve. The copywriting engine behind every piece of content.

04 — Content Pillars

The four themes we rotate through. Every post fits one.

05 — Post Formats & Templates

Plug-and-play structures for each content type. Fill in the blanks.

06 — Finished Post Examples

See exactly what a completed post looks like. Copy the pattern.

07 — Hook Bank

30 scroll-stopping hooks sorted by pillar. Grab and go.

08 — Visual Rules

Colors, typography, layout. How every post should look.

09 — Video Content (Remotion)

How we build short-form video. Structure, pacing, and tooling.

10 — Posting Cadence & Calendar

What to post, when, where. Plus a sample week filled in.

11 — The Repurposing Machine

One piece of content becomes five. The workflow that multiplies your output.

12 — Value Positioning

Why clients pay. The 4 types of value and how to communicate them.

13 — The 80/20 Rule & Organic Strategies

80% give value, 20% ask. 10 strategies that cost nothing.

14 — The Content Flywheel

How content feeds the business system. Marketing → Proof → Loop.

15 — Quotes Bank

Ready-to-use one-liners for posts, captions, and video hooks.

---

16 — Metrics & KPIs

How you know the content is working. What to track and what "good" looks like.

---

17 — Pre-Publish Checklist

Run through this before every post goes live.

SECTION 01

Brand Positioning

Before you write a single word, know who you are and who you're talking to.

The One-Liner

> **Most business websites look fine and do nothing. We fix that.**

This is the lens for everything. Every post should make the audience feel this truth — their site isn't working, and there's a better way.

Who We Are

CrftdWeb is a one-person web studio that builds conversion-first websites from scratch. No templates. No page builders. No middlemen. Every site is hand-coded in Next.js, designed around the TRAIN system, and delivered in 2–5 weeks.

Who We're Talking To

IDEAL CLIENT

Small business owners

£50k–£5M revenue. They make decisions fast. They understand that growth costs money. They want a site that works, not one that just exists.

THEIR PAIN

Invisible online

Their current site is slow, outdated, or doesn't convert. They're losing clients to competitors with better web presence. They've been burned by cheap agencies before.

WHAT THEY WANT

A site that sells for them

Not a brochure. A website that functions as their best salesperson. They want proof it works (metrics, case studies, speed scores).

WHO WE AVOID

"How cheap can you do it?"

No budget shoppers. No "build for exposure." No micromanagers who want to approve every pixel. No projects under £997.

Positioning Statement

We're not the cheapest. We're not the biggest. We're the studio that builds websites which actually generate revenue — hand-coded, conversion-first, delivered fast.

SECTION 02

Voice & Tone Rules

Sound like a sharp friend who knows what they're doing. Not a corporate brochure.

RULE 01

Direct, not aggressive

Say what you mean in as few words as possible. Don't soften with "just" or "maybe." But don't be a jerk about it either.

RULE 02

Honest, not arrogant

Challenge bad thinking. Say what others won't. But back it up with proof, not ego. "We'd rather be honest" is the energy.

RULE 03

Specific, not vague

Numbers beat adjectives. "53% of visitors leave after 3 seconds" beats "many visitors leave quickly." Use metrics. Name tools. Be concrete.

RULE 04

Problem-first, always

Never start with "We build..." Start with "You're losing..." The audience doesn't care about you. They care about their problem.

Words We Never Use

BANNED WORDS

leverage · synergy · digital transformation · crafting excellence

world-class · elevate · revolutionary · game-changer

holistic · cutting-edge · solution-oriented · innovative

best-in-class · disrupting · empowering · ecosystem

Copy Rules

DO THIS

"Your website should be your best salesperson."

"We hand-code everything. No templates."

"Our last 5 projects averaged 96 PageSpeed."

"53% of visitors leave after 3 seconds."

NOT THIS

"We build premium bespoke websites."

"Our holistic solutions leverage cutting-edge tech."

"We're the best agency for your needs."

"Many visitors leave quickly."

FORMATTING RULES

No em dashes.

Use periods or commas. "We build websites. Custom coded." Not "We build websites — custom coded."

One CTA per section.

Don't give 5 choices. One clear next step: "See what we built."

Short paragraphs.

Max 3 sentences. If it looks dense, break it up.

Show, don't claim.

Proof beats assertions. Screenshots beat promises. Data beats opinions.

SECTION 03

The PAS Framework

Every piece of content follows this structure. No exceptions.

Problem → Agitate → Solve

The copywriting engine behind every post, video, caption, and ad.

STEP 1

Problem

Name the pain. Be specific. Make them feel seen. "Your website loads in 6 seconds. Half your visitors are already gone."

STEP 2

Agitate

Turn up the heat. Show what happens if they do nothing. "Every day that site is live, you're paying for traffic that bounces."

STEP 3

Solve

Present the fix. Be concrete. "We rebuilt it in 3 weeks. Load time: 1.4s. Bounce rate dropped 40%."

Why PAS Works

People don't buy solutions. They buy relief from pain. PAS puts the pain first, makes it feel urgent, then positions you as the obvious fix. It works because it mirrors how people already think about their problems.

PAS In Action — Short-Form Example

INSTAGRAM / TIKTOK CAPTION

P: Your website takes 6 seconds to load.

A: That means 53% of your visitors never see your homepage. They leave before the logo loads. You're paying for traffic that bounces.

S: We rebuilt a client's site last month. Load time went from 6.2s to 1.4s. Enquiries doubled in two weeks. Link in bio for a free audit.

PAS In Action — Video Script (15-30s)

SHORT-FORM VIDEO

[0-5s] Problem: Bold text on screen. Hook the viewer. "Your website is losing you money."

[5-15s] Agitate: Show the data. Red metrics. Slow load. Bad mobile view. "6.2 second load time. 53% bounce rate. You're invisible on Google."

[15-25s] Solve: Flip to green. Fast load. Clean design. Real metrics. "We rebuilt it. 1.4s load. 40% more enquiries."

[25-30s] CTA: Logo + one line. "Free site audit. Link in bio."

Key Principle: One Concept Per Post

> **If you can't explain the idea in one sentence, you're trying to say too much for a single post. Split it into two.**
>
> Adapted from Jack Butcher's "Visualize Value" philosophy

Every post should communicate one clear idea. Not three insights packaged together. One sharp thought, visualized clearly, with a single CTA.

SECTION 04

Content Pillars

Every post fits into one of these four categories. Rotate through them.

---

1. Problem Exposure

Show businesses what's broken about their website. Use data, audits, and real examples to make the pain visible.

Examples:
"Your site takes 6s to load. Here's what that costs you."
"I audited 10 local business websites. 8 failed basic SEO."
"This is what your website looks like on mobile. Yikes."

2. Contrarian Takes

Challenge conventional thinking. Say what agencies won't. Cross out the old way, state the real way.

Examples:
"Your website doesn't need a redesign. It needs a rebuild."
"Stop asking 'does it look good?' Start asking 'does it convert?'"
"Templates are why your site looks like everyone else's."

3. Process & Education

Teach how good websites work. Break down conversion thinking, design principles, and the TRAIN system.

Examples:
"The 5 things every homepage needs (most have 0)."
"Why your hero section should talk about THEM, not you."
"Here's the exact process we use: Discover → Design → Develop → Deliver."

4. Proof & Results

Show the work. Before/after metrics. Client conversations. PageSpeed scores. Real results, not claims.

Examples:
"Client site went from 6.2s → 1.4s load time. Here's the rebuild."
"PageSpeed: 23 → 96. Same content. Different build."
"This client got 3x more enquiries after we rebuilt their site."

Pillar Rotation

Don't post the same type three times in a row. Rotate through pillars to keep the feed balanced. A good rhythm:

DAY	PILLAR	WHY
Mon	PROBLEM EXPOSURE	Start the week by making the pain visible
Wed	CONTRARIAN TAKE	Mid-week engagement driver (hot takes spark comments)
Fri	PROOF & RESULTS	End the week with credibility. People research on weekends.
Sun (optional)	EDUCATION	Position as expert. Build trust for the Monday sell.

SECTION 05

Post Formats & Templates

Plug-and-play structures. Pick a format, fill in the blanks, post.

Format 1: The Audit Post

PROBLEM EXPOSURE Best for showing broken websites and missed opportunities.

TEMPLATE

⚠️ INDUSTRY Website Audit

I checked NUMBER INDUSTRY websites in CITY.

Here's what I found:

✗ PROBLEM 1 + STAT

✗ PROBLEM 2 + STAT

✗ PROBLEM 3 + STAT

Every one of these is costing you clients.

CTA: Free audit offer or "DM me your URL"

Format 2: The Hot Take

CONTRARIAN TAKE Best for engagement. Challenges what people assume is true.

TEMPLATE

~~OLD THINKING~~

NEW THINKING

Here's why:

1. REASON WITH PROOF
2. REASON WITH PROOF
3. REASON WITH PROOF

Most agencies won't tell you this because REASON.

CTA: "See what a rebuild looks like →" or "DM me"

Format 3: The Before / After

PROOF & RESULTS Best for credibility. Show the transformation with real numbers.

TEMPLATE

Before → After

❌ Load time: BEFORE METRIC

✅ Load time: AFTER METRIC

❌ Bounce rate: BEFORE

✅ Bounce rate: AFTER

❌ Monthly enquiries: BEFORE

✅ Monthly enquiries: AFTER

Same business. Same audience. Different website.

CTA: "Want to see what yours could look like?"

Format 4: The One-Liner Insight

EDUCATION One sharp thought. Minimal design. Maximum impact.

TEMPLATE

ONE POWERFUL SENTENCE

Black background, white text, centered. Logo bottom-left. That's it.

Inspired by Visualize Value. These work because they're fast to consume, easy to share, and impossible to misunderstand. Examples: "Your website should be your best salesperson." / "Nobody cares what you do. Everyone cares what you can do for them."

SECTION 05 (CONTINUED)

More Formats

Format 5: The DM Conversation

PROOF & RESULTS Simulated or real client messages showing the transformation story.

TEMPLATE

CLIENT: "Our website hasn't brought in a single lead in months."

You: "Send me the URL. Let me take a look."

[Show diagnosis]

You: "SPECIFIC PROBLEM FOUND"

[Time skip: "3 weeks later"]

CLIENT: "We got RESULT in the first week. This is insane."

CTA: "DM your URL for a free audit."

Format 6: The Process Breakdown

EDUCATION Show how you work. Transparency builds trust.

TEMPLATE

How we build a website in X weeks:

1. **Discover** — We learn your business, audience, and goals.
2. **Design** — We design around your customer's problems, not your logo.
3. **Develop** — Hand-coded. No templates. 90+ PageSpeed.
4. **Deliver** — Live on your domain with 2 weeks of post-launch support.

CTA: "Book a free discovery call."

Format 7: The "Nobody Cares" Post

CONTRARIAN TAKE The most important content lesson: talk about THEM, not you.

TEMPLATE

Your hero section right now:

"We are a TYPE company providing SERVICE solutions."

What it should say:

" `OUTCOME YOUR CUSTOMER WANTS` . In `TIMEFRAME` ."

Nobody cares what you do. Everyone cares what you can do for them.

Caption Formula (All Formats)

Every social caption follows this exact structure:

1. **Hook (Line 1)**
   Stop the scroll. Bold claim, shocking stat, or provocative question. This line decides if they read the rest.

2. **Body (Lines 2–6)**
   PAS structure. Problem → Agitate → Solve. Keep paragraphs to 1–2 sentences. Use line breaks aggressively.

3. **CTA (Last Line)**
   One clear action. "DM me your URL." "Link in bio." "See what we built →" Never more than one.

SECTION 06

Finished Post Examples

Stop guessing. Here's exactly what a completed CrftdWeb post looks like. Copy the pattern.

Example 1: The Audit Post

PROBLEM EXPOSURE

1080 × 1080

CW

⚠️ Plumber Website Audit

I checked 10 plumber websites in Birmingham. Here's what I found:

✗ 8 out of 10 take over 5 seconds to load

✗ 6 out of 10 aren't mobile-friendly

✗ 9 out of 10 have zero SEO setup

✗ 7 out of 10 have no clear call-to-action

Every one of these is costing you clients.

Free Site Audit →

CAPTION

Hook: I audited 10 plumber websites in Birmingham. 8 of them are losing clients every day.

Body: Slow load speeds. No mobile design. Zero SEO. These aren't small problems. 53% of visitors leave after 3 seconds. If your site takes 5+, you're invisible.

CTA: DM me your URL. I'll tell you the one thing that's costing you the most.

#webdesign #plumberwebsite #birminghambusiness #websiteaudit #smallbusiness

Example 2: The One-Liner Insight

EDUCATION

1080 × 1080

CW

Your website should be your best salesperson.

CRFTDWEB.COM

CAPTION

Hook: If your website isn't generating enquiries, it's not doing its job.

Body: Most business websites are digital brochures. They look fine but do nothing. Your site should be working 24/7 — qualifying leads, building trust, booking calls. If it's not, the problem isn't traffic. It's the site.

CTA: Free audit. Link in bio.

Example 3: The Before / After

PROOF & RESULTS

1080 × 1080

CW

Before → After

BEFORE			AFTER		
6.2s	23	72%	1.4s	96	31%
LOAD TIME	PAGESPEED	BOUNCE RATE	LOAD TIME	PAGESPEED	BOUNCE RATE

Same business. Same audience. Different website.

See The Rebuild →

SECTION 07

Hook Bank

30 scroll-stopping first lines sorted by pillar. Grab one, write the PAS body, post.

🔴 Problem Exposure Hooks

I audited 10 `INDUSTRY` websites in `CITY` . 8 of them are losing clients daily.

Your website takes 6 seconds to load. Here's what that's costing you.

This is what your website looks like on mobile. No really, look.

I Googled " `THEIR SERVICE` near me." Your competitor showed up. You didn't.

53% of your visitors leave before your homepage loads. Here's why.

Your website has zero calls-to-action. Where are people supposed to go?

I can tell in 3 seconds if a website was built on a template. So can your clients.

Your contact page has 12 form fields. Nobody's filling that out.

🟡 Contrarian Take Hooks

Your website doesn't need a redesign. It needs to be rebuilt from scratch.

Stop asking "does it look good?" Start asking "does it convert?"

Squarespace is why your site looks like every other site in your industry.

The best marketing strategy? A website that actually works.

"We're a family-run business with 20 years of experience." Nobody cares. Here's what to say instead.

Your hero section talks about you. It should talk about them.

Hiring the cheapest web designer is the most expensive decision you'll make.

Your website isn't a brochure. It's a machine. Build it like one.

🟢 Proof & Results Hooks

This client went from 2 enquiries/month to 14. We only changed one thing.

PageSpeed: 23 → 96. Same content. Same business. Different build.

We rebuilt this site in 3 weeks. Load time dropped from 6.2s to 1.4s.

"We got 3 new clients in the first week." Here's what we changed.

Before: template site, 72% bounce rate. After: custom build, 31% bounce rate.

This plumber's website went from invisible to the first page of Google in 6 weeks.

🔵 Education Hooks

The 5 things every homepage needs (most have zero).

Here's exactly how we build a website in 3 weeks. Step by step.

Your website has 3 seconds to make a first impression. Here's how to use them.

One design change that increased conversions by 40%. (It's not what you think.)

The difference between a website that "looks nice" and one that makes money.

Nobody cares what you do. Everyone cares what you can do for them.

Why every business website should score 90+ on PageSpeed. And how to get there.

Your website should answer one question in 3 seconds: "Am I in the right place?"

SECTION 08

Visual Rules

Every post should be instantly recognizable as CrftdWeb before they read a word.

Color Palette

Background	Primary	Problem	Solution	Warning	Info
#0a0a0a	#ffffff	#ef4444	#10b981	#f59e0b	#3b82f6

COLOR RULES

Max 2–3 colors per post.
Dark background + white text + one accent. That's it.

Red = problems.
Slow load times, broken things, what's wrong. Always #ef4444.

Green = solutions.
Fast loads, conversions, results. Always #10b981.

Never use color for decoration.
Every color communicates something.

Typography

PRIMARY FONT

Inter

All body text, captions, and UI elements. Weights: 400 (body), 600 (emphasis), 700 (subheads), 900 (headlines).

LOGO FONT

Classicismo

Used exclusively for the CrftdWeb logo mark. Never for body text or headlines.

TYPE RULES

Headlines: Inter 900, tight tracking.
Big, bold, minimal. Let the weight do the work.

Max 2 font families.
Never introduce a third typeface. Ever.

Uppercase labels only.
Small caps with wide letter-spacing (0.2em) for category labels, section names, and tags.

Body text stays at 400 weight.

Don't bold entire paragraphs. Bold individual words for emphasis.

Layout — The TRAIN System

Typography
Max 2 fonts. Weight = hierarchy.

Restraint
2–3 colors max. Less = more.

Alignment
Grids. Precision = trust.

Image
Consistent treatment. Same filter/crop.

Negative Space
Space frames ideas. Let it breathe.

Applied
Every visual. Every post. Every build.

The 12 Visual Devices

Use these to communicate any concept visually. Every post should use at least one.

Scale
Size = significance

Comparison
Side-by-side contrast

Metaphor
Abstract made tangible

Pattern Recognition
Visual patterns decoded fast

Flow
Sequential A → B progression

Stacking
Layered accumulation

Continuum
Position along a range

Venn Diagram
Overlapping factors

Hierarchy
Top-to-bottom structure

Cartesian Plot
Two-axis relationships

Loops
Cyclical feedback processes

Spectrum
Range between extremes

POST DIMENSIONS

FORMAT	SIZE	USE
Vertical Video	1080 × 1920px (9:16)	TikTok, Reels, Shorts
Square Post	1080 × 1080px	Instagram Feed, LinkedIn
Carousel Slide	1080 × 1350px (4:5)	Instagram Carousel

FORMAT	SIZE	USE
Story	1080 × 1920px	Instagram/Facebook Stories

SECTION 09

Video Content

Short-form video built with Remotion. Programmatic, consistent, on-brand every time.

Tooling

All CrftdWeb videos are generated programmatically using **Remotion** (React-based video framework). This ensures every video is pixel-perfect, on-brand, and reproducible.

TOOL	PURPOSE
Remotion	Video composition framework (React + TypeScript)
remotion/compositions/	Individual video files (one per composition)
remotion/compositions/brand.tsx	Shared brand config (colors, animations, Logo, CtaBadge)
npm run remotion:preview	Opens Remotion Studio for previewing
npm run remotion:render	Renders all videos to out/videos/

Video Structure (PAS)

Every video follows the same timing arc:

P **Problem (0–5 seconds)**
Bold text, dark background. Hook the viewer immediately. One line max.

A **Agitate (5–15 seconds)**
Red accents, data points, visual proof of the problem. Animated metrics, checkmarks, phone mockups. Make them feel the pain.

S **Solve (15–25 seconds)**
Green accents, flipped metrics, clean design. Show the transformation. Concrete results.

→ **CTA (Last 3–5 seconds)**
Logo + "Free site audit" badge. Clean, simple, no clutter.

Current Video Library

COMPOSITION	PILLAR	DURATION	HOOK
PainPoint	PROBLEM	8s	"Your website looks fine. So why isn't it working?"
BeforeAfter	PROOF	10s	Before/After metrics flip
HotTake	CONTRARIAN	7s	"Your site doesn't need a redesign. It needs a rebuild."

COMPOSITION	PILLAR	DURATION	HOOK
DmResults	PROOF	12s	iMessage conversation showing client results
NobodyCares	CONTRARIAN	10s	"Nobody cares what you do."

ANIMATION CONVENTIONS

Fade-in from below
— Default entrance for text. 12 frames (0.4s) duration.

Count-up
— For metrics (23 → 96). Adds energy to numbers.

Red → Green color transition
— Problem state flips to solution state.

Shake animation
— Used on "bad" examples (broken websites, slow metrics).

Safe zones
— Top 150px and bottom 480px are reserved for platform UI (TikTok, Reels).

SECTION 10

Posting Cadence & Calendar

Consistency beats volume. Show up regularly with quality. Here's the system and a real week filled in.

Weekly Schedule

DAY	PLATFORM	FORMAT	PILLAR
Monday	TikTok + Reels	Short-form video	PROBLEM EXPOSURE
Tuesday	Instagram Feed	Static image / carousel	EDUCATION
Wednesday	TikTok + Reels	Short-form video	CONTRARIAN TAKE
Thursday	Instagram Feed	Before/After image	PROOF
Friday	TikTok + Reels	Short-form video	PROOF / DM RESULTS
Weekend	Stories	Behind-the-scenes / Polls	Casual engagement

Platform Notes

TIKTOK

Primary growth channel

Short-form vertical video. Hook in first 2 seconds. Trending audio optional but not required (text-based content works). Post 3–5x per week minimum.

INSTAGRAM REELS

Cross-post everything

Same video as TikTok, just remove watermark. Reels get 2x reach vs. feed posts. Always use relevant hashtags (5–10 max).

INSTAGRAM FEED

Portfolio & proof

Carousels and static images. Before/after posts, one-liner insights, process breakdowns. Feed should look cohesive (dark theme).

LINKEDIN

B2B positioning

Text posts + one image. Problem-solution format. Professional tone (slightly less provocative). Share process and business insights.

Hashtag Strategy

STANDARD HASHTAG SET (PICK 5–10)

Core: #webdesign #websitedesign #smallbusinesswebsite #webdeveloper #uxdesign

Niche: #conversionrateoptimization #webdesignagency #customwebsite #pagespeed

Business: #smallbusiness #businessowner #entrepreneurlife #growthmarketing

Location: #londonwebdesign #ukwebdesigner # `YOUR-CITY` business

Sample Week — Filled In

Here's what an actual week looks like. No guessing, no blank stares at your phone.

DAY	POST	PLATFORM
Mon	**"I audited 10 plumber websites in Birmingham. 8 are losing clients."** PROBLEM Audit Post	TikTok + Reels Video (15s)
Tue	**"5 things every homepage needs (most have zero)."** EDUCATION Carousel (5 slides)	Instagram Feed 1080×1350 slides
Wed	**"Your website doesn't need a redesign. It needs a rebuild."** CONTRARIAN Hot Take Video	TikTok + Reels Video (10s)
Thu	**"PageSpeed: 23 → 96. Same content. Different build."** PROOF Before/After Image	Instagram Feed 1080×1080
Fri	**"This client got 3x more enquiries after we rebuilt their site."** PROOF DM Results Video	TikTok + Reels Video (12s)
Sat	**Behind-the-scenes: "Building a landing page for a landscaping company"** Story / Casual video	Stories Informal
Sun	**"Your website should be your best salesperson."** EDUCATION One-Liner Post	Instagram + LinkedIn 1080×1080

SECTION 11

The Repurposing Machine

One piece of content becomes five. Never create from scratch when you can multiply.

The 1 → 5 Workflow

Every video you create should produce at least 4 more assets. Here's the exact flow:

📹 **TikTok Video** → 📱 **Instagram Reel** → 🎴 **Quote Card** → 📝 **LinkedIn Post** → 🧵 **Twitter Thread**

Repurposing Matrix

SOURCE	BECOMES	HOW
Short-form video	Instagram Reel	Remove TikTok watermark, re-upload natively
Short-form video	Quote card (image)	Screenshot the hook text frame → post as 1080×1080 static
Short-form video	LinkedIn post	Write out the PAS script as a text post. Add the key screenshot.
Short-form video	Twitter/X thread	Break PAS into 3-4 tweets. Hook → Problem → Solution → CTA.
Instagram carousel	Blog post	Expand each slide into a paragraph. Add SEO keywords.
Client project	5+ assets	Before/after + case study + testimonial card + audit video + process BTS
Audit post	Video	Screen-record the audit. Narrate what's wrong. Same content, new format.

The "Content Sawdust" Rule

> **Every client project should produce a minimum of 5 pieces of content. If it doesn't, you're leaving value on the table.**

1. **Before Screenshot**
   Grab PageSpeed, mobile view, and desktop view of the old site before you touch anything.

2. **Process Recording**
   Screen-record yourself building for 30 seconds. Speed it up 4x. That's a TikTok.

3. **After Screenshot**
   New PageSpeed score, new mobile view. Put side-by-side with the before. That's a Before/After post.

4. **Client Testimonial**
   Ask for feedback systematically. Screenshot the message. That's a DM Results post.

5

Case Study

Problem → Process → Result written up. That's a carousel, blog post, and portfolio piece.

SECTION 12

Value Positioning

Don't sell what you do. Sell the value of what you do for them. Frame everything around the client's outcome.

The Value Ladder

Not all work is valued equally. Position yourself in the "Can't Do" zone. That's where premium pricing lives.

LOW VALUE

"Don't Do"

Easy, non-specific tasks anyone can do. Squarespace templates. Fiverr gigs. Commodity work. The market is flooded and price is the only differentiator.

MEDIUM VALUE

"Won't Do"

Specific tasks that require commitment and consistency. Running a proper web design service. Most agencies sit here.

HIGH VALUE

"Can't Do"

Ultra-specific, high-expertise work. Hand-coded conversion systems. TRAIN methodology. Proprietary process. This is where CrftdWeb lives.

CONTENT ANGLE

Show the difference

Your content should constantly illustrate the gap between template sites and custom builds. Make the value visible.

Four Types of Value

Every piece of content should deliver at least one of these. The best content delivers two or three.

TYPE	WHAT IT MEANS	CONTENT EXAMPLE
💰 **Monetary**	Help them make money	"This website change doubled our client's enquiries in 2 weeks."
🔧 **Functional**	Help them do something better	"5 things your homepage needs (most have 0)."
🧠 **Psychological**	Help them feel better	"Your website isn't your fault. But fixing it is your responsibility."
🤝 **Social**	Help them fit in / stand out	"Your competitors' websites look like this. Yours looks like this."

The 10X Pricing Rule

> **At this price point, can your customer get a 10X return on investment?**

Use this in your content to justify pricing. Don't defend your prices. Frame the ROI.

DEFENSIVE

ROI-FRAMED

"Our prices reflect the quality of work."

"We charge more because we're better."

"A £2,497 site that brings in £25k of new business. That's a 10X return."

"What's one new client worth to you? Now multiply by 12 months."

The Value Gap

Content that sells identifies the gap between where the client is and where they want to be. Your job is to make that gap obvious, then show you can close it.

1. **Name the pain point**
   "Your website loads in 6 seconds. You're losing 53% of visitors before they see your offer."

2. **Quantify the cost**
   "If 10 people visit daily on average, that's 5 lost leads. 150 per month. What's each lead worth?"

3. **Show the fix is simple**
   "We rebuilt a client's site in 3 weeks. Load time: 1.4s. Bounce rate dropped 40%. Enquiries doubled."

4. **Make it impossible to say no**
   "Free audit. No commitment. We'll show you exactly what's costing you money."

SECTION 13

The 80/20 Rule & Organic Strategies

80% of your content gives value. 20% asks for it. Get this ratio wrong and you become noise.

The 80/20 Reciprocity Rule

80% — GIVE VALUE

Build equity in the market

Teach. Share. Help. Create. Show your process. Give away insights. Build trust before you ever ask for anything.

20% — ASK

Collect dividends

Sell. Promote. Launch. "Book a call." "Link in bio."

If 5 posts go out this week, 4 should be pure value (education, audits, insights, behind-the-scenes). Only 1 should directly sell.

10 Organic Marketing Strategies (£0 Ad Spend)

#	STRATEGY	HOW TO APPLY IT
01	**Create Urgency**	"Taking 2 more projects this month." Limited availability, time-bound offers.
02	**Answer Questions in Public**	Turn FAQs into posts. "How much does a website cost?" becomes content.
03	**Endorsements**	Let clients do the marketing. Share testimonials, screenshots, results.
04	**The Reverse Pitch**	"If you're happy with your current site's performance, this isn't for you."
05	**Problem / Solution**	Specific problem → you as the answer. This IS the PAS framework.
06	**Permissionless Proof**	Audit random websites publicly. Redesign them without being asked. Show what you'd fix.
07	**Case Studies**	Before/after on social. PageSpeed scores. Enquiry numbers. Real results.
08	**Transparency**	Share revenue. Share failures. Share process. Openness builds trust.
09	**Behind-the-Scenes**	Record yourself building. Show the code. Share the design process. "Selling sawdust."

#	STRATEGY	HOW TO APPLY IT
10	**Ask & Receive**	"Drop your URL and I'll give you one thing to fix." Engagement + lead gen.

"Selling Sawdust"

> **Make content that points out the problem. Make products that solve it.**

Document everything you do. The process of building a client site IS the content. Screen recordings, design decisions, code snippets, before/after screenshots. The sawdust from your work is more valuable than most people's finished product.

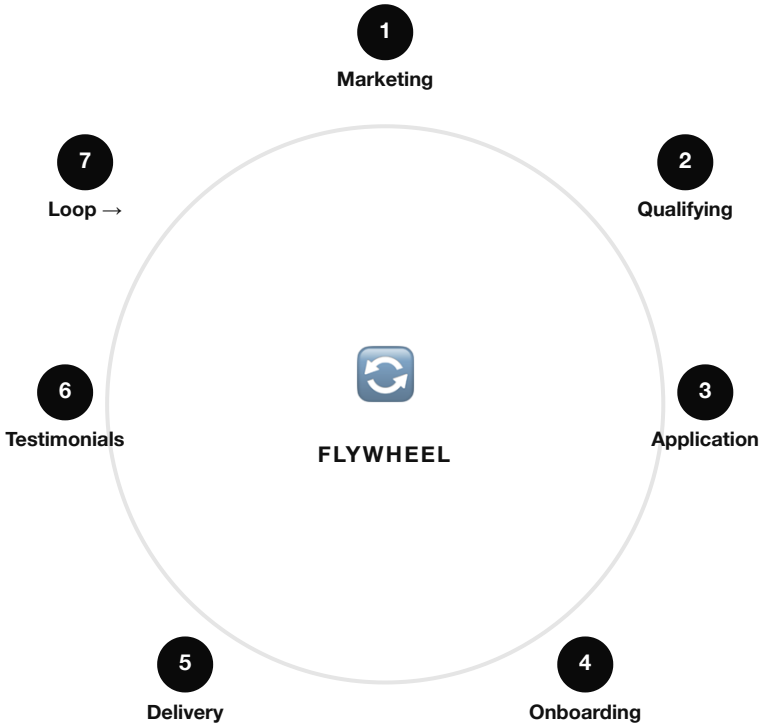
SECTION 14

The Content Flywheel

Content isn't separate from the business. It IS the business system. Every post feeds the next sale.

The 7-Stage System

Every stage feeds the next. Testimonials become marketing. Marketing drives qualifying. The flywheel never stops.



1 Marketing

Posts, videos, audits, articles. Assets that work 24/7. This playbook covers this stage.

2 Qualifying

Position as the solution to a specific problem. Content should pre-qualify: "If your site isn't converting, we fix that."

3 Application

Prospects provide info before getting access. Discovery call booking. Free audit form. The system protects your time.

4 Onboarding

Systematic intake. Story, payment, logins, hosting. No back-and-forth emails.

5 Delivery

Discover → Design → Develop → Deliver. The TRAIN system applied. Consistent quality every time.

6 Testimonials

Get feedback systematically. Every completed project produces a case study, a testimonial, and a before/after post.

7 Loop

Feed testimonials back into marketing. The case study becomes content. The content attracts new clients. Repeat.

The Proof & Price Loop

PHASE 1

Get Proof

Give it away or charge less. Do free audits. Build portfolio pieces. Document everything.

PHASE 2

Get Paid

Once you have proof, charge for it. Case studies justify pricing.

PHASE 3

Get More Proof

Every paid project creates better proof. Better proof = higher prices.

PHASE 4

Get Paid More

The loop compounds. Your reputation becomes your marketing.

The Productization Path

Content documents the journey. Each stage is a different content angle:

STAGE 1

Skill

"Here's what I'm learning"

STAGE 2

Result

"Here's what I built"

STAGE 3

Specialize

"Here's what I do best"

STAGE 4

Productize

"Here's the system"

SECTION 15

Quotes Bank

Ready-to-use one-liners for posts, video hooks, and captions. Black background, white text, centered. Done.

CrftdWeb Originals

"Most business websites look fine and do nothing. We fix that."

"Your website should be your best salesperson."

"Nobody cares what you do. Everyone cares what you can do for them."

"Your website doesn't need a redesign. It needs a rebuild."

"We hand-code everything. No templates. No compromises."

"We'd rather be honest than easy to work with."

"53% of visitors leave after 3 seconds. How fast does your site load?"

"Stop asking 'does it look good?' Start asking 'does it convert?'"

"Your website isn't a brochure. It's a machine. Build it like one."

"A pretty website that doesn't convert is just expensive decoration."

"Templates are why your site looks like everyone else's."

"Your hero section talks about you. It should talk about them."

Borrowed Wisdom (Always Attribute)

"Learn to sell, learn to build. If you can do both, you will be unstoppable."

— Naval Ravikant

"Escape competition through authenticity."

— Naval Ravikant

"The world doesn't reward people who are best at solving problems. It rewards people who communicate problems best."

— David Perell

"If you can't describe what you are doing as a process, you don't know what you're doing."

— W. Edwards Deming

"You get paid in direct proportion to the difficulty of problems you solve."

— Elon Musk

"Compound interest is the eighth wonder of the world."

— Albert Einstein

"Consistency creates competence."

— Visualize Value

"Information without application is entertainment."

— Visualize Value

HOW TO USE THESE

ONE-LINER POST

Black background. White text. Centered.

One quote. CW logo bottom-left.

Caption: 2-3 lines expanding the thought.

VIDEO HOOK

Use as opening text (0-3 seconds).

Then expand with PAS in the rest.

Quote appears bold, then fades to detail.

SECTION 16

Metrics & KPIs

How you know the content is working. Track these numbers weekly. Adjust based on data, not feelings.

Primary Metrics (Track Weekly)

METRIC	WHAT IT MEASURES	TARGET	WHERE TO CHECK
Profile Visits	Are people curious enough to check you out?	↑ 10% week-over-week	Instagram / TikTok analytics
Reach	How many unique people saw your content?	↑ Consistent growth, not vanity	Platform insights
Saves + Shares	Was this valuable enough to save or send to someone?	Save rate > 2% of reach	Instagram insights
DMs Received	Is content driving real conversations?	3+ per week from content	Inbox
Website Clicks	Are people moving from social to your site?	10+ per week from bio link	Link-in-bio analytics / GA
Audit Requests	Is the CTA converting?	2+ per week	Inbox / Form submissions

Secondary Metrics (Track Monthly)

METRIC	WHAT IT TELLS YOU	TARGET
Follower Growth Rate	Is the audience actually growing?	2–5% monthly growth
Engagement Rate	Are followers actually engaged?	3–6% (likes + comments + saves ÷ followers)
Best Performing Pillar	Which content type resonates most?	Double down on what works
Discovery Call Bookings	Is content driving real business?	4+ per month from social
Revenue from Social	The only metric that actually matters long-term	Track client source: "How did you find us?"

What "Good" Looks Like

RED FLAG

High reach, zero DMs

Your content is entertaining but not converting. You're getting views but no action. Fix the CTA. Make the next step obvious.

GREEN FLAG

Low reach, high saves

Small audience but deeply engaged. This is better than viral with no follow-through. Keep going. The audience will grow.

RED FLAG

Followers up, enquiries flat

You're attracting the wrong audience or your 80/20 ratio is off. Check: are you actually asking for the sale 20% of the time?

GREEN FLAG

DMs saying "I need this"

Your PAS is working. They feel the pain, they see the solution, they're reaching out. This is the goal. Close them.

Weekly Review (5 minutes every Sunday)

- ☐ How many posts went out this week? (Target: 5–7)
- ☐ Which post got the most saves/shares? Why?
- ☐ Which post got the least engagement? Why?
- ☐ How many DMs or audit requests came in?
- ☐ What's the plan for next week? (Map to pillars)

SECTION 17

Pre-Publish Checklist

Run through this before every piece of content goes live.

Content Quality

- ☐ Does it follow PAS? (Problem → Agitate → Solve)
- ☐ Is the hook strong enough to stop someone scrolling?
- ☐ One concept only? If you're saying two things, split into two posts.
- ☐ Problem-first framing? (not "we build..." but "you're losing...")
- ☐ Specific, not vague? (numbers, metrics, examples — not adjectives)
- ☐ No banned words? (leverage, synergy, game-changer, world-class, etc.)
- ☐ One CTA only? One clear next step, not three options.
- ☐ Would you stop scrolling for this? Be honest.

Visual Quality

- ☐ On-brand colors? (#0a0a0a background, white text, red/green accents)
- ☐ Inter font only? (unless logo placement)
- ☐ Max 2–3 colors in the design?
- ☐ CW logo present and properly placed?
- ☐ Safe zones respected? (no content in top 150px or bottom 480px for video)
- ☐ Text is readable at mobile size? (not too small, enough contrast)
- ☐ Negative space applied? (not cramped — let it breathe)

Platform Requirements

- ☐ Correct dimensions? (1080×1920 video, 1080×1080 feed, 1080×1350 carousel)
- ☐ Caption written with hook-first structure?
- ☐ Hashtags included? (5–10, mixed size and niche)
- ☐ CTA matches the content? (don't just default to "link in bio")
- ☐ Cross-posted to all relevant platforms?
- ☐ No TikTok watermark on Instagram version?

Value & Strategy

- ☐ Does this deliver value? (monetary, functional, psychological, or social)

- ☐ Is this an 80% post (give value) or a 20% post (ask for value)?
- ☐ Does the CTA match the 80/20 ratio for the week?
- ☐ Could this become a case study, testimonial, or proof piece later?

Final Gut Check

- ☐ Does this sound like CrftdWeb? (direct, honest, sharp — not corporate)
- ☐ Would a business owner feel this in their gut?
- ☐ Is this something worth saving or sharing?
- ☐ Are you proud of it?

REMEMBER

Consistency beats perfection.

Ship it. Learn. Improve. Ship again.

Internal use only. Not for distribution.
